SOLVENCY INDEX GLOBAS

100-199

companies with the highest solvency level, that almost guarantee promptly discharge of obligations. Minimal risk of default from financial obligations. Cooperation with a company from that group is considered to be more attractive due to possible profitability and minimal risks;

200-299

companies with high solvency level, also characterized by full discharge of obligations in time. Little risk of default from financial obligations. Discharge of obligations could be affected by economic situation change. Non-solvency during nearest 12 months is hardly probable;

300-449

companies with satisfactory solvency level that does not guarantee full discharge of obligations in time. Average or higher risk of default from financial obligations. Discharge of obligations could be strong affected by economic situation change. Non-solvency is possible during nearest 12 months;

450-549

companies with weak solvency level that does not enable full discharge of obligations in time. High risk of default from financial obligations. Strong dependence from borrowings and economic situation changes. High possibility of non-solvency during nearest 12 months. Business cooperation and crediting are not recommended;

550-600

companies with unsatisfactory solvency level. The highest risk of default from financial obligations. Lack of assets to discharge obligations. Very high possibility of non-solvency during nearest 12 months. Business cooperation and crediting are rejected.
